## **Shell computing      Wikipedia**

January 14th, 2019 - In computing a shell is a user interface for access to an operating system s services In general operating system shells use either a command line interface CLI or graphical user interface GUI depending on a computer s role and particular operation It is named a shell because it is the outermost layer around the operating system kernel CLI shells require the user to be familiar with

## **Ribbon computing      Wikipedia**

January 15th, 2019 - In computer interface design a ribbon is a graphical control element in the form of a set of toolbars placed on several tabs

The typical structure of a ribbon includes large tabbed toolbars filled with graphical buttons and other graphical control elements grouped by functionality. Such ribbons use tabs to expose different sets of controls eliminating the need for numerous parallel toolbars.
