Double Pendulum from Eric Weisstein's World of Physics

January 16th, 2019 - A double pendulum consists of one pendulum attached to another. Double pendula are an example of a simple physical system which can exhibit chaotic behavior. Consider a double bob pendulum with masses m_1 and m_2 attached by rigid massless wires of lengths l_1 and l_2 . Further let the angles the two wires make with the vertical be denoted θ_1 and θ_2 as illustrated above.
